
Brief - Cook It

— Project scope of Cook It —

Scope Overview

We are looking to make simple 1 page web application that can be linked to from our website.

The purpose of this is for a potential customer to be able to create a meal plan each week or day.

It needs to be simple and easy to use.

Everything that the customer needs is easy to access and understand.

Scope Parameters

The app should

- Be able to create a meal plan.
- Have dietary options and make a plan to fit the users dietary needs.
- Ability to have day or week planning.
- Personalised aspect to the app - Possible Welcome message.
- Ability to easily access the recipes in the created plan.
- Ability to save previously liked plans or recipes.

Functions of the website

Drop down menu of the parameters - which allow to be selected by the user.

Render results - to be able to render the weekly plan to HTML.

Render recipe - to be able to render each recipe to the HTML.
