User Story

Example user story for my cooking app for MS2 project

Example User - What they want to do

I am looking to set up a meal plan for the week.

I want to be able to create a meal plan, by set parameters.

I want to be able see the different recipes that are in my plan.

What does the Website need to do?

Ability to process a meal plan.

Ability for me to add parameters to the meal planner.

Ability to click on the recipes to see the recipe in the main window

Functions of the website

Drop down menu of the parameters - which allow to be selected by the user.

Render results - to be able to render the weekly plan to HTML.

Render recipe - to be able to render each recipe to the HTML.
